EDUCATION

Sandip University   **Nashik , India**
B. Tech CSE in Cloud Technology and Information Security   **August 2022 - May 2026**

SDA High School   **Lasalgaon , India**
ICSE 10 + 2   **August 2007 - March 2022**

SKILLS SUMMARY

- **Languages:**   Python, Bash, SQL, C++, Java, HTML
- **Frameworks:**   Selenium, Pandas, Metasploit, Wireshark, Burp Suite, Nmap, SET, Django, Flask, NumPy, Tkinter
- **Tools:**   Autopsy, Node.js, Maltego, John, Hydra, PowerPoint, Excel, Word, Wondershare
- **Platforms:**   PyCharm, Visual Studio Code, VMware
- **OS:**   Kali Linux, Ubuntu, TAILS, RHEL, Windows
- **Soft Skills:**   Public speaking, Creative thinking, Communication, Friendliness, Kindness
- **Hard Skills:**   OSINT, Dark web Investigation and Monitoring, Ethical Hacking, Shell Scripting, Digital Forensics, Cloud Architecture, Painting, 3D Animation

PROJECTS

Zip-CrackerX | LINK   **February 10 – March 1, 24**

- This is a Python programmed Software designed to perform brute force attacks on password-protected zip files. It comes with both a Command Line Interface (CLI) version and a Graphical User Interface (GUI) version to cater to different user preferences.
- It is used to test the password strength of a zip file which is encrypted using the zip legacy encryption.
- The GUI Version provides a user-friendly graphical interface for performing brute force attacks, making it easy for the testers to interact with the program.
- Both versions of the program provide real-time feedback during the brute force attack, allowing users to monitor the progress and status of the attack.

DarkwebHoster | **LINK**   **September 15 - October 28, 24**

- It is a streamlined and powerful tool, specifically designed to allow users to host .onion websites on the dark web using the Tor network.
- By leveraging Tor for privacy and Termux for Android compatibility, DarkwebHoster enables users to set up their .onion websites and establish a presence on the dark web right from their mobile device.
- This Software solves the problem of establishing a dedicated server for hosting, as this transforms your mobile device into a server and builds a hidden service folder.
- This Software reduced the cost of hosting an .onion website to absolute zero.

CERTIFICATES

100 Days of Code: The Complete Python Bootcamp | LINK   **May 1, 24**

- Acquired expertise in procedural programming paradigms and associated logical concepts, enhancing capabilities.
- Mastered fundamental Python syntax, proficiently utilizing control flow, loops, functions, and data structures.
- Mastered various frameworks like Selenium, Pandas, Django, Flask, NumPy, and Tkinter.
- Made many real-time projects during the sessions.

The Complete Computer Forensics Course : CFCT+ PRO CFIR DFIR | LINK   **June 26, 24**

- Acquired expertise in digital forensics, evidence collection and preparation.
- Learned various fundamentals like disk and file analysis, storage acquisitions, Linux filesystems, network forensics and browser forensics.

Ethical Hacking / Penetration Testing & Bug Bounty Hunting | LINK   **January 10, 25**

- Acquired expertise in Penetration testing & Bug Bounty Hunting using various tools and frameworks.
- Mastered web application testing using Burp Suite, by performing various simulations of attacks.
- Learned the OWASP top 10 and its security standards.
