

Junaid Nizam Quadri

Founder & Cybersecurity Researcher

Nashik, Maharashtra, India

quadrijunaid369258@gmail.com | +917020534364 | LinkedIn | GitHub: yottajunaid | Portfolio

PROFESSIONAL SUMMARY

Cybersecurity specialist with 3+ years of hands-on cybersecurity research in deep web and dark web investigations, OSINT, and threat intelligence. Currently pursuing B.Tech in Computer Science with specialization in Cloud Technology and Information Security (CGPA: 9.1/10). Red Teaming enthusiast with hands-on experience in vulnerability assessment, penetration testing, digital forensics, and ethical hacking. Passionate about offensive security, threat analysis, and leveraging cutting-edge technologies to solve complex security challenges.

EDUCATION

Bachelor of Technology in Computer Science Engineering 2022 – 2026

Specialization: Cloud Technology and Information Security

Sandip University, Nashik

CGPA: 9.1/10

Higher Secondary Education (10+2)

SDA High School, ICSE Board

2022

Percentage: 81%

PROFESSIONAL EXPERIENCE

Cybersecurity Engineer (Intern) 2025

SECT

- Conducted comprehensive reconnaissance and vulnerability assessments on production environments
- Performed data breach analysis and OWASP Top 10 security mapping for enterprise applications
- Delivered detailed security reports with actionable remediation strategies
- Collaborated with cross-functional teams to implement security best practices

Cybersecurity Instructor 2026

CIVORA NEXUS PVT. LTD.

- Delivered training on cybersecurity concepts: threat modeling, vulnerability assessment, and secure coding
- Mentored students on cybersecurity fundamentals with real-world attack and defense scenarios
- Covered OWASP Top 10, basic penetration testing, and risk mitigation techniques
- Monitored and evaluated student projects for secure implementation and best practices
- Designed hands-on labs and assessments to build practical security skills

Founder & Cybersecurity Researcher 2026

MASTER-DARKNET

- Built and maintained an open-source cybersecurity platform focused on darknet research, anonymity, and threat analysis
- Developed 250+ pages of structured, research-driven content on Tor, I2P, cryptographic systems, and digital forensics
- Designed an academic-style curriculum on hidden networks, surveillance, and adversarial security models
- Published technical insights on darknet architecture, threat behavior, and privacy-preserving technologies
- Continuously expanded the platform as a “living textbook” for cybersecurity research and education

- Scaling the platform toward 800+ pages as a comprehensive cybersecurity knowledge base

TECHNICAL SKILLS

Cybersecurity: Cyber Threat Intelligence (CTI), Ethical Hacking, Vulnerability Assessment and Penetration Testing (VAPT), Digital Forensics, OSINT, Deep & Dark Web Research, Network Security, MITRE ATT&CK Framework, Threat Analysis, OWASP Security Standards

Security Tools: Metasploit, Burp Suite, Tor, Nmap, Wireshark, John the Ripper, Hashcat

Programming & Scripting: Python, Bash, PowerShell, Shell Scripting, HTML/CSS, Object-Oriented Programming

Operating Systems: Kali Linux, Ubuntu, TAILS, RHEL, Windows, Unix

Tools & Platforms: Linux System Administration, Docker, Git/GitHub, VMware, VirtualBox, Networking

Soft Skills: Creative Thinking, Technical Documentation, Research & Analysis

CERTIFICATIONS

Certified Red Team Path Graduate – TryHackMe **August 2025**

- Performed active and passive reconnaissance, phishing attacks, and network security evasion
- Enumerated and exploited Active Directory environments
- Demonstrated persistence techniques and security solution evasion

100 Days of Code: The Complete Python Bootcamp – Udemy **May 2024**

- Mastered Python programming including control flow, loops, functions, and data structures
- Gained proficiency in Selenium, Pandas, Django, Flask, NumPy, and Tkinter

The Complete Computer Forensics Course: CFCT+ PRO CFIR DFIR – Udemy **June 2024**

- Acquired expertise in digital forensics, evidence collection, and disk/file analysis
- Learned Linux filesystems, network forensics, and browser forensics

Ethical Hacking / Penetration Testing & Bug Bounty Hunting – Udemy **January 2025**

- Mastered web application testing using Burp Suite and OWASP Top 10 security standards
- Conducted simulated attacks and penetration testing scenarios

KEY PROJECTS

SpiderHash – Hash Cracking Tool (Final Year Project) **Python (GUI)**

- Developed offensive security software capable of cracking 22+ hashing algorithms
- Implemented brute-force, probabilistic, rule-based, wordlist, and rainbow table attacks
- Created a user-friendly GUI for efficient password recovery operations

Master-Darknet – Comprehensive Dark Web Documentation **Research Project**

- Created long-term documentation exploring technical, historical, and ethical aspects of deep web/dark web
- Documented anonymity networks, Tor architecture, and privacy-preserving technologies
- Available at: yottajunaid.github.io/Master-Darknet

Cybersecurity Assessment Report – SECT Internship Project **VAPT**

- Conducted comprehensive security assessment, including reconnaissance and vulnerability scanning
- Performed OWASP mapping and data breach analysis on the production domain
- Delivered professional security report with remediation recommendations
- Available at: yottajunaid.github.io/SECT_Internship_Project

DarkwebHoster – Tor Hidden Service Deployment Tool**Python (CLI)**

- Automated conversion of localhost to Tor hidden service (.onion domain)
- Implemented secure configuration and anonymity features
- Available at: github.com/yottajunaid/DarkwebHoster

Zip-CrackerX – Password Recovery Tool**Python (GUI/CLI)**

- Developed cross-platform ZIP file password cracker using brute-force algorithms
- Created both command-line and graphical user interfaces
- Available at: github.com/yottajunaid/Zip-CrackerX

ACHIEVEMENTS & RECOGNITION

- TryHackMe: Red Teamer of the Month, ADversary, Burp'ed, OWASP Top 10, Metasploitable badges
- Hacking streak achievements: 180 consecutive days
- Active contributor to the cybersecurity community with open-source security tools
- Published TOR-Forensics: Curated collection of dark web forensics study materials
